Food and medications. Your doctor may ask you to have a clear liquid diet for one to two days before surgery. And, usually, you'll need to stop eating and drinking after midnight on the night before your procedure. Let your doctor know about all of the medications, vitamins and dietary supplements you're taking.

Neobladder reconstruction - Mayo Clinic

Appropriate patient selection for OBS is one of the keys to success. All cystectomy patients are possible candidates for a neobladder. Nowadays, although contraindications for OBS are fewer than in the past, it is important to identify patients in whom OBS may be less ideal (Table 1). Before determining the urinary diversion method, surgeons should consider the patient's preferences and general performance status, renal and hepatic function, primary tumor stage and location, and the need for ...

Keys to Successful Orthotopic Bladder Substitution eBook ...

More recently, however, orthotopic bladder substitution (or neobladder formation) emerged as an alternative to the ileal conduit. Various surgical techniques have been described; all involve the use of bowel to create a urinary reservoir that is anastomosed to the urethra. 5 , 6 Some clinicians now consider the neobladder to represent the "gold ...

Orthotopic Bladder Substitution (Neobladder) Indications ...

Orthotopic neobladder reconstruction is becoming an increasingly common urinary diversion following cystectomy for bladder cancer. This is in recognition of the potential benefits of neobladder surgery over creation of an ileal conduit related to quality of life (QoL), such as avoiding the need to form a stoma with its cosmetic, psychological and other potential complications.
