NUT M20-2.5 HEX 10.9 Plain - calfast.com

The M42 318is engine shares its bolt pattern with the M50 six-cylinder family of engines used in the E36 models as well as the S50 engines used in later E36 and E46 cars. This is the same bolt pattern as the M20 six-cylinder, but it is rotated 10 degrees to the left, which means that swapping the E30 transmission for a later one is possible but difficult.

M20 aftermarket head bolts? - R3V Limited Forums

Metric fasteners are specified with a
thread pitch instead of a thread count.
The thread pitch is the distance between
threads expressed in millimetres
(measured along the length of the
fastener). For example a thread pitch of
1.5 means that the distance between
one thread and the next is 1.5mm.
