### Nephrology And Urology In The

To summarize, nephrologists specifically treat diseases that affect the kidneys and their ability to function, such as diabetes or kidney failure. Urologists treat conditions of the urinary tract, including those that can be affected by the kidneys such as kidney stones and obstruction.

### Nephrology vs Urology: What's the Difference? - Revere Health

Urologists and nephrologists both treat kidney problems. Urologists are surgical specialists who focus on anatomical or structural disorders of the kidneys and urinary tract. They treat problems such as kidney stones, kidney blockages, and kidney cancer. Urologists are qualified to perform surgery and outpatient medical procedures to correct such conditions.

### What is the difference between a urologist and a nephrologist?

The fields of nephrology and urology share some overlap because they can both involve the kidneys. While a nephrologist focuses on diseases and conditions that affect the kidney more directly, a...

### What is a Nephrologist? Conditions, When to See One, and More

The fields of nephrology and urology share some overlap because they can both involve the kidneys. Urologists are more concerned with anatomical kidney problems and deal with the rest of the urinary tract including the ureters, bladder, urethra and prostate as well. Unlike urologists, nephrologists do not perform surgery.
