Nikon D600 Manual Lens Compatibility

With a built-in AF motor and an aperture feeler for manual-focus lenses, it works great with every Nikon auto- or manual-focus lens made since 1977! The D600 works perfectly with every AF lens made since 1987, AF, AF-I, AF-D and AF-S. It also works great with AI and AI-S manual-focus lenses, and if you update the really old ones to AI, all Nikon's SLR lenses from as far back as 1959 work just fine with color matrix metering and aperture-priority auto exposure and full EXIF data.

Nikon D600 Specifications - Ken Rockwell

Manual Manual Focus AI-S Nikon Series E lenses, made for the compact Nikon EM introduced in 1979, starting the use of plastics. The 75-150mm f/3.5 Series E reached mythical stature in the film era. Don't have a CPU, AI-P: Manual AI-S Nikon lenses with a CPU that sends the lens information to the camera body.

I am considering buying a Nikon D600 or a D800. I have some old manual lenses, most of them have Pentacon Six a.k.a. Kiev 60 mounts. On my Nikon D3200 I was able to use these lenses with adapters (such as Pentacon-to-Nikon and Arax Tilt), in manual mode. I assume that those adapted lenses behave in a same way as pre-AI Nikkor lenses, right?

Nikon | Imaging Products | Lens Compatibility - Nikon D610

When a camera or lens is introduced, of course its manual can't talk about compatibility with future products. For instance, my TC-16A autofocusing converted explicitly says it's only compatible with the N2020, which was true when it came out in 1985, but it works great on my F4 and F6. The F5 manual says it works, too. This Applies to Nikon ...

Nikon Lens Compatibility - Ken Rockwell

Older lenses that were manual focus, like the legacy Nikon F-mount lenses, had brilliant optics and control, but no brain. Unlike modern lenses that are 'chipped', they couldn't digitally communicate with the camera, so there was no AF, and couldn't even speak automatically to the cameras to tell them what aperture they were at, and what focal length so metering properly was non-existent.

How To Use Old Legacy Lenses On Your Modern Nikon DSLR ...

Nikon Speedlight Compatibility Chart. Nikon has produced many Speedlights over the years, we have compiled a chart to assist with the compatibility between Nikon cameras and Speedlights. Please click on the Speedlight in the table below to see it's compatibility chart.

Nikon Speedlight Compatibility Chart

Nikon currently offers teleconverters in 1.4x, 1.7x and 2x magnifications. These AF-S teleconverters utilize the Nikon f/mount, and are compatible with all Nikon film-based SLRs and DSLRs (FX and DX formats), as well as the Nikon 1 cameras when using the FT-1 F Mount Adapter.

Using Teleconverters | Nikon

Sigma lists the lens to be compatible with the D5600. However, the entire list is prefaced with a disclaimer that "It is not guaranteed for all function and performance." Sigma may or may not eventually issue a firmware update for your particular lens to make it compatible with newer Nikon bodies. Historically it's a bit hit or miss.

Why isn't a Sigma HSM lens autofocusing with my Nikon ...

Most likely is will work with the d600, which has an AI coupling mechanism. Most lenses in Nikon mount made after 1977 should work. Older lenses can be modified for –\$25. If you post a picture of the lens showing the aperture ring it will be easy to tell.

Compatibility d600 and old lenses - Nikon Lens Discussion ...

The Nikon D600 definitely has more clearance between the lens mount and the flash than the D7000. Judging from the photos available, we have determined the clearance is similar to the D800. The D800 allows full tilt and shift movements with the 24mm PC-E, although a few movements require rotating 180-degrees to obtain without interference.
