## **International Institute of Space Law**

Last Modified Date: August 20, 2020. International space law is a body of law which concerns activities in space, usually defined for legal purposes as the lowest point from which objects can orbit the Earth and beyond. This area of the law has its origins in the 1950s, when many nations began discussing the possibility of space exploration and the need to regulate the use of space.

## **What is International Space Law? (with pictures)**

Space law in any meaningful sense started to develop immediately following the launch of Sputnik-1 in October 1957, and ever since has presented a fascinating new body of (essentially) international law. The human space endeavour started with the two superpowers the Soviet Union and the United States, then increasingly involved other states as well.
