What's the Best Language for a Beginning Programmer?

First programming languages. In the 1940s, the first recognizably language required a great deal of intellectual effort. An early proposal for a high-level programming language was Plankalkül, developed by Konrad Zuse for his Z1 computer between 1943 and 1945 but not implemented at the time. The first functioning programming languages designed to communicate instructions to a computer were written in the early 1950s.

History of programming languages - Wikipedia
