Pythagorean Theorem - Word Problems (Worksheets, Solutions)

The Pythagorean Theorem, $a^2 + b^2 = c^2$, describes the relationship between the lengths of the three sides of a right triangle. The theorem, which is likely the most famous theorem in mathematics, states that adding the squares of a right triangle's leg lengths will equal the square of the hypotenuse length. Students will encounter this theorem in their math curriculum, on various standardized tests, and in real-world applications outside the classroom.
