premises in anticipation of a failover event. Today, Software Assurance customers have one free passive instance for either high availability or DR

### **New high availability and disaster recovery benefits for ...**

Introduced in SQL Server 2016, a distributed availability group allows an availability group to span availability groups configured on different clusters. This decouples the requirement to have the nodes all participate in the same cluster, which makes configuring disaster recovery much easier.

### **Disaster recovery for SQL Server - SQL Server | Microsoft Docs**

To enable AlwaysOn feature, Open SQL Server Configuration Manager, Right-click SQL Server instance and go to properties, Select AlwaysOn High Availability tab section and tick checkbox for Enable AlwaysOn AvailabilityGroups. Note: - We also need to make sure nodes where we will enable AlwaysOn feature is part of Windows Failover Cluster.

### **Configuring a SQL Server AlwaysOn High Availability Group**

Always On availability groups: a high-availability and disaster-recovery solution. 04/23/2019; 7 minutes to read +5; In this article. Applies to: SQL Server (all supported versions) The Always On availability groups feature is a high-availability and disaster-recovery solution that provides an enterprise-level alternative to database mirroring.

### **Availability groups: a high-availability and disaster ...**

Important. An availability database is sometimes called a database replica in Transact-SQL, PowerShell, and SQL Server Management Objects (SMO) names. For example, the term "database replica" is used in the names of the Always On dynamic management views that return information about availability databases: sys.dm\_hadr\_database\_replica\_states and sys.dm\_hadr\_database\_replica\_cluster\_states.
