Teacher Guide To Animal Behavior

TEACHER GUIDE to ANIMAL BEHAVIOR PASS for Grade 7 Life Science Standard 4 All organisms must be able to grow, reproduce, and maintain stable internal conditions while living in a constantly changing external environment. Behavioral response is a set of actions determined in part by heredity and in part by experience. Text for the Bellringer

TEACHER GUIDE to ANIMAL BEHAVIOR

Behaviors allow animals to satisfy hunger, escape other animals, and have relationships with others of their own species. Mating behaviors allow for reproduction. Scientists have many different methods for studying behavior, some of which are general while others are specialized for certain animals.

When bees need to communicate with one another, they do a waggle dance; when squirrels live in small social groups, they are willing to risk their lives to protect the others. These sorts of behaviors are at the core of a scientific field of study called "ethology"—the study of animal behavior.

Guide to Ethology: Exploring the Study of Animal Behavior ...

The result of these observations is a catalog of behaviors and activities exhibited by an animal, also known as an ethogram. For this project, students conduct independent ethological research observing the behavior of an animal species of their choice (e.g., a family pet) at least two or three times and then construct a basic ethogram.
