The website gives you access to over 1 million free e-Books and the ability to search using subject, title and author.

Unit 4 Ecosystems Background Learner

Unit 4 Ecosystems Background. Introduction. The abundance of a species and species diversity affect how natural resources are processed within an ecosystem. This pattern of processing contributes to functional and compositional characteristics of an ecosystem. But many ecosystems around the world are currently experiencing significant changes in species composition, abundance, and diversity due to the influence of human activity.

Unit 4 : Ecosystems -6- www.learner.org (for more details, see Unit 3, "Oceans"). The distribution of temperature, light, and nutrients set broad conditions for life in aquatic biomes in much the same way that climate and soils do for land biomes. Marine and freshwater biomes change daily or seasonally. For example, in the intertidal zone where

Unit 4 : Ecosystems - Learner

Unit 4 // Section 4. Along with energy, water and several other chemical elements cycle through ecosystems and influence the rates at which organisms grow and reproduce. About 10 major nutrients and six trace nutrients are essential to all animals and plants, while others play important roles for selected species (footnote 3).

Ecosystems Online Textbook - Annenberg Learner

Ecology Lab (Units 4, 7, 9, 13) As you learned in Unit 4, ecosystems are a complex and delicate balancing game. The addition or removal of any species affects many other species that might compete for or provide food. In this lab you will get a chance to "build your own" ecosystem, and explore the effects of these interrelationships.[launch lab](#)

Ecosystems - Annenberg Learner

Grade 4: Exploring Ecosystems Unit Description. Students will use theatre and the visual arts to explore ecosystems. The unit's projects will lead students to make discoveries about producers, consumers, and decomposers, as well as energy sources. Students will create an ecosystem diorama as well as a scripted puppet show.

Grade 4: Exploring Ecosystems | ArtsNow Learning

In Activity 4.4 students use the 2-pool simulation to explore the effects of various disturbances on ecosystems. Press disturbances are long-term changes to the environment that may affect an ecosystem's photosynthesis limit. Pulse disturbances are one-time events that ecosystems often recover from.
