Hastings (1999) traces the interest in discourse analysis in the field of urban policy research to the "spawning sub-discipline of cultural geography which, since the early 1980s, has been engaged in exploring the contested meanings that are a feature of city life" (p. 8).

Discourse Analysis and its Utility for Urban Policy Research

Introduction. In the social sciences in general and geography in particular, the popularity of the concept of discourse is closely linked to the philosophical approaches and epistemological shifts associated with "post-structuralism" and the cultural and linguistic turns. Very broadly speaking, discourse analysis is concerned with the constitution of knowledge on the one hand and power relations, subjectivities, and identities on the other.
